

# Pericles

Policy recommendation and improved communication tools for law enforcement and security agencies preventing violent radicalization

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 740773

# VULNERABILITY ASSESSMENT TOOL

(Task 4.3)

## Tool objectives:

This tool helps to assess the risk of radicalisation and the choice of approach that can be taken. It combines different types of indicators, such as behaviour, school results, mental health issues, police records, and social contacts in order to assess vulnerability of an individual or group to (further) radicalise.

## Overview of approach to development/methodology:

By combining indicators from different organisations, such as LEAs, schools, and social work, cooperation between these organisations is stimulated and a multi-agency perspective is promoted. The tool uses input from PERICLES tools Cyberspace Detection Tool, Enhanced Platform, and the Engaging Families Tool as well as expertise from other projects such as FP7 project SAFIRE and TERRA and builds on existing assessment tools for radicalisation that are now being used by, among others, the Dutch National Police. This tool receives inputs from tools 1, 2, 4, and 5, and delivers output to tools 4 and 5.
